

## **2019 Board of Directors Annual Report**

My Mutual Insurance continues to thrive in the face of an ever changing world economy. It is my pleasure to present the 2019 Annual Report for My Mutual Insurance.

My Mutual has had another successful year, with 29.656 million dollars in gross premiums, and 8.5 percent increase over our last fiscal year, resulting in a net income of 1.894 million dollars for 2019.

For over 125 years, My Mutual has consistently delivered industry-leading insurance products to our valued policyholders. As a mutual company, we have a responsibility to ensure our mission and values are front and center in the way we conduct business and the way we treat our policyholders. We consistently strive to build insurance products with our policyholders in mind.

My Mutual Insurance is always on the lookout for ways to not only contribute to our own growth, but also enhance the community of Waldheim, where our headquarters is proudly located. This year, we have partnered with Redbird Communications, with the goal of providing enhanced broadband internet services to My Mutual and to the community of Waldheim. This new partnership promises to keep us on the cutting edge of technology, and is being received well by our surrounding community.

We would not be in the strong position we are in today without the hard work and dedication of our valued employees. Valerie Fehr is a competent and respected Chief Executive Officer, who daily leads an exceptional leadership team, along with their staff. It is always a pleasant experience to visit our head office and see the camaraderie among all who work here. In addition to serving the interests of My Mutual Insurance, Valerie also serves on the Farm Mutual Re Board of Directors, where she advocates for the interests of all Canadian mutual insurance companies. The Board of Directors actively guides My Mutual Insurance, always with an eye to its success and growth. I would like to thank my colleagues on the board for their contribution and commitment to the future of My Mutual. Each director is a long serving individual who brings highly relevant expertise and experience to My Mutual Insurance.

Proud to belong to our mutual community,

Many Kla

### MANAGEMENT'S RESPONSIBILITY

To the Board of Directors of My Mutual Insurance Limited:

Management is responsible for the preparation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with International Financial Reporting Standards. This responsibility includes selecting appropriate accounting principles and methods and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintain the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors is composed entirely of individuals who are neither management nor employees of the Company. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities. The Board fulfills these responsibilities by reviewing the financial statements prepared by management and discussing relevant matters with management and external auditors. The Board is also responsible for recommending the appointment of the Company's external auditors.

The Appointed Actuaries, Ernst & Young LLP, are appointed by the Board of the Company. The Appointed Actuaries are responsible for discharging the various actuarial responsibilities and conduct a valuation of policy liabilities, in accordance with generally accepted actuarial standards, reporting results to management and the Audit Committee.

KPMG LLP, an independent firm of Chartered Professional Accountants, is appointed by the Board to audit the financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

### INDEPENDENT AUDITORS' REPORT

To the policyholders of My Mutual Insurance Limited,

### **Opinion**

We have audited the financial statements of My Mutual Insurance Limited (the "Entity"), which comprise:

- the statement of financial position as at December 31, 2019
- the statement of comprehensive income for the year then ended
- the statement of changes in policyholders' surplus for the year then ended
- the statement of cash flows for the year then ended
- and notes to financial statements, including a summary of significant accounting policies

(Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Entity as at December 31, 2019, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

### Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "Auditors' Responsibilities for the Audit of the Financial Statements" section of our auditors' report.

We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

### Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

#### We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
  error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
  sufficient and appropriate to provide a basis for our opinion.
  - The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
  of the Entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Entity to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the
  disclosures, and whether the financial statements represent the underlying transactions and events in a
  manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 1. Reporting entity:

My Mutual Insurance Limited ("the Company") is incorporated without share capital under the laws of the Province of Saskatchewan and is subject to the *Saskatchewan Insurance Act*. The Company is licensed to write property and casualty insurance in Saskatchewan. The Company is domiciled in Canada and its registered office is Box 190, Waldheim, Saskatchewan.

#### 2. Basis of presentation:

#### a) Statement of compliance:

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS").

These financial statements for the year ended December 31, 2019 were approved and authorized for issue by the Board of Directors on February 22, 2020.

#### b) Basis of measurement:

These financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value.

### c) Functional and presentation currency:

All currency amounts are presented in Canadian dollars, which is the functional currency of the Company.

#### d) Significant accounting judgments, estimates and assumptions:

The preparation of the Company's financial statements requires management to make judgments, estimates, and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the reporting date. However, uncertainties about these assumptions and estimates could result in outcomes that would require a material adjustment to the carrying amount of the asset or liability affected in the future.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to account estimates are recognized in the period in which the estimate is revised if revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The estimates and assumptions that have a significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year relate primarily to the provision for unpaid claims.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

#### 2. Basis of presentation (continued):

There are several sources of uncertainty that need to be considered by the Company in estimating the amount that will ultimately be paid on claims. The uncertainty arises because all events affecting the ultimate settlement of claims have not taken place and may not take place for some time. Changes in the estimate of the provision can be caused by receipt of additional claim information, changes in judicial interpretation of contracts, or significant changes in severity or frequency of claims from historical trends. The estimates are based on the Company's historical experience and industry experience. Additional details are provided in note 9 and 12.

### 3. Significant accounting policies:

#### a) Insurance contracts:

The Company issues property and casualty insurance contracts with a duration of a year or less. Insurance contracts are those contracts that transfer significant insurance risk. Insurance risk is defined as the possibility of having to pay benefits on the occurrence of an insured event.

Property insurance contracts compensate the Company's customers for damage suffered to their property or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

Casualty insurance contracts protect the Company's customers against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non-contractual events. The typical protection offered is designed for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability) and for employers who become legally liable to pay compensation to injured employees (employers' liability).

Automobile insurance contracts compensate the Company's customers for damage suffered to their automobiles and provide financial protection against third party physical damage and/or bodily injury resulting from traffic collisions and against liability that could also arise therefrom.

#### i) Premiums earned and deferred policy acquisition costs:

Insurance premiums are included in income on a pro rata basis over the life of the policies. The portion of the premium related to the unexpired portion of the policy at the end of the reporting period is reflected as unearned premiums. Acquisition costs related to unearned premiums, which are comprised of commissions and premium taxes, are deferred and amortized to income over the periods in which the premiums are earned. The method followed in determining the deferred policy acquisition costs limits the amount of the deferral to its realizable value by giving consideration to claims and expenses expected to be incurred as the premiums are earned.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 3. Significant accounting policies (continued):

#### ii) Unpaid claims:

The provision for unpaid claims represents an estimate for the full amount of all costs, including investigation and the projected final settlements, of claims incurred prior to the statement of financial position date, including claims incurred but not reported ("IBNR") by policyholders. These estimates of future loss activity are necessarily subject to uncertainty and are selected from a wide range of possible outcomes. The provisions are adjusted up or down as additional information affecting the estimated amounts become known during the course of claims settlement. All changes in estimates are recorded as incurred claims in the current period. Claims liabilities are carried on an undiscounted basis.

#### iii) Liability adequacy test:

At each reporting date the Company performs a liability adequacy test on its insurance liabilities less deferred policy acquisition expenses to ensure the carrying value is adequate, using current estimates of future cash flows, taking into account the relevant investment return. If that assessment shows that the carrying amount of the liabilities is inadequate, any deficiency is recognized as an expense in the statement of comprehensive income initially by writing off the deferred policy acquisition expense and subsequently by recognizing an additional claims liability for claims provisions.

### iv) Reinsurance ceded:

The Company enters into reinsurance contracts in the normal course of business in order to limit potential losses arising from certain exposures. Reinsurance premiums are accounted for in the same period as the related premiums for the direct insurance business being reinsured. Reinsurance liabilities, comprised of premiums payable for the purchase of reinsurance contracts, are included in accounts payable and accrued liabilities and are recognized as an expense when due.

Expected reinsurance recoveries on unpaid claims and adjustment expenses are recognized as assets at the same time and using principles consistent with the Company's method for establishing the related liability. Amounts recoverable from reinsurers are assessed for indicators of impairment at the end of each reporting period. An impairment loss is recognized and the amount recoverable from the reinsurers is reduced by the amount by which the carrying value exceeds the expected recoverable amount under the impairment analysis.

#### b) Financial instruments:

All financial instruments are initially recognized on the statement of financial position at fair value at acquisition. Fair value is determined by the instrument's initial cost in a transaction between unrelated parties. Measurement in subsequent periods depends on whether the financial instrument has been classified as fair value through profit or loss, available-for-sale, held-to-maturity, loans and receivables, or other financial liabilities. Transactions to purchase or sell these items are recorded on the settlement date. During the year, there has been no reclassification of financial instruments.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 3. Significant accounting policies (continued):

i) Financial assets at fair value through profit or loss:

The Company has classified the following financial assets at fair value through profit (loss): cash and cash equivalents and investments.

The Company has designated investments on initial recognition at fair value through profit (loss) in accordance with the Company's investment policy which evaluates and manages the performance of the investments on a fair value basis. These investments are also reported to key management personnel on a fair value basis. Fair value is determined by published price quotations in an active market. Transactions to purchase or sell these items are recorded on the settlement date and transaction costs are immediately recognized in profit (loss).

Financial assets at fair value through profit (loss) are subsequently measured at their fair value. Net gains and losses arising from changes in fair value are recognized immediately in profit (loss).

#### ii) Loans and receivables:

The Company has classified receivables arising from insurance contracts as loans and receivables.

Loans and receivables are subsequently measured at their amortized cost, using the effective interest method. Under this method, estimated future cash receipts are exactly discounted over the asset's expected life, or other appropriate period, to its net carrying value. Amortized cost is the amount at which the financial asset is measured at initial recognition less principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and less any reduction for impairment or uncollectability. Net gains and losses arising from changes in fair value are recognized in net income upon derecognition impairment.

The Company assesses impairment of all its financial assets, except those classified at fair value through profit (loss). Management considers the recoverability of the financial asset, such as delinquency in interest payments in determining whether objective evidence of impairment exists. Impairment is measured as the difference between the asset's carrying value and its fair value. Any impairment, which is not considered temporary, is included in current year profit (loss).

The Company reverses impairment losses on financial assets carried at amortized cost when the decrease in impairment can be objectively related to an event occurring after the impairment loss was recognized.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 3. Significant accounting policies (continued):

#### iii) Other financial liabilities:

The Company has classified the following financial liabilities as other financial liabilities: accounts payable and accrued liabilities, due to reinsurer and provision for unpaid claims.

Financial liabilities measured at amortized cost are subsequently measured at amortized cost using the effective interest method. Under this method, estimated future cash payments are exactly discounted over the liability's expected life, or other appropriate period, to its net carrying value. Amortized cost is the amount at which the financial liability is measured at initial recognition less principal repayments, and plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount. Net gains and losses arising from changes in fair value are recognized in profit (loss) upon derecognition.

#### c) Fair value measurements:

The Company classifies fair value measurements recognized in the statement of financial position using a three-tier fair value hierarchy, which prioritizes inputs used in measuring fair value as follows:

- Level 1: Quoted prices (unadjusted) are available in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices in active markets that are observable for the asset or liability, either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the Company to develop its own assumptions

Fair value measurements are classified in the fair value hierarchy based on the lowest level input that is significant to that fair value measurement. This assessment requires judgment, considering factors specific to an asset or a liability and may affect placement within the fair value hierarchy.

#### d) Cash and cash equivalents:

Cash and cash equivalents comprise cash on hand, demand deposits and short-term highly liquid investments with original maturities of three months or less that are readily convertible into known amounts of cash and which are subject to an insignificant risk of change in value.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 3. Significant accounting policies (continued):

#### e) Property and equipment:

Property and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. When parts of an item of property and equipment have different useful lives, they are accounted for as separate items of property and equipment. Depreciation is provided using the following methods and rates intended to depreciate the cost of the assets over their estimated useful lives:

	<u>Method</u>	<u>Rate</u>
Buildings and building components	straight-line	5%
Furniture and equipment	straight-line	10-20%
Vehicles	straight-line	20%

The useful lives of items of property and equipment are reviewed on an annual basis and the useful life is altered if estimates have changed significantly. Gains or losses on the disposal of property and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in other income.

#### f) Income taxes:

Current tax and deferred tax are recognized in profit or loss except to the extent that the tax is recognized either in comprehensive income or directly in equity, or the tax arises from a business combination.

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The calculation of current tax is based on the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the assets are realized or the liabilities are settled.

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of goodwill and temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting nor taxable income.

Recognition of deferred tax assets for unused tax losses, tax credit and deductible temporary differences is restricted to those instances where it is probable that future taxable profit will be available which allow the deferred tax asset to be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 4. New accounting standards:

In 2019, the Company adopted IFRS 16 Leases.

In January 2016, the IASB issued IFRS 16 Leases to replace IAS 17 Leases, effective for annual periods beginning on or after January 1, 2019.

This standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value.

A lessee is required to recognize a right-of-use (ROU) asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. This standard substantially carries forward the lessor accounting requirements of IAS 17, while requiring enhanced disclosures to be provided by lessors. Other areas of the lease accounting model have been impacted, including the definition of a lease.

The following shows the Company's accounting policy choices under the transitional provisions:

- i The Company has applied the practical expedient to "grandfather" previous assessments of which existing contracts are, or contained leases.
- ii. Leasees must adopt IFRS 16 using either a full retrospective or a modified retrospective approach. The Company has adopted the new standard using the modified retrospective approach under which the cumulative effect of adoption will be recognized in opening Policyholders' Surplus as at January 1, 2019, with no restatement to the comparative figures.
- iii. The Company has elected the exemption to recognize assets and liabilities for all leases with either a term of less than 12 months or where the underlying asset is of low value, typically less than US\$5,000.

As at January 1, 2019, all existing leases met the exemption criteria, and there was therefore no effect on the opening Policyholders' Surplus as at January 1, 2019.

However, during the year, new leases that did not meet the exemption criteria have been accounted for using the new standard.

### Other New Standards

The Company has not yet applied the following new standards, interpretations and amendments to standards that have been issued as at December 31, 2019 but are not yet effective.

#### IFRS 17 Insurance Contracts

In May 2017, the International Accounting Standards Board (IASB) issued IFRS 17 *Insurance Contracts*. The new standard is effective for annual periods beginning on or after January 1, 2021 and will replace IFRS 4 *Insurance Contracts*. This standard introduces consistent

accounting for all insurance contracts. The standard requires a company to measure insurance contracts using updated estimates and assumptions that reflect the timing of cash flows and any uncertainty relating to insurance contracts. Additionally, IFRS 17 requires a company to

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

recognize profits as it delivers insurance services, rather than when it receives premiums. The Company intends to adopt IFRS 17 in its financial statements for the annual period beginning on January 1, 2021. The extent of the impact of adoption of the standards as not yet been determined.

#### IFRS 9 Financial Instruments

In July 2014, (IASB) issued the complete version of IFRS 9 (IFRS 9 (2014)). IFRS 9 (2014) introduces new requirements for the classification and measurement of financial assets. Under IFRS 9 (2014), financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. The standard also introduces additional changes relating to financial liabilities and amends the impairment model by introducing a new 'expected credit loss' model for calculating impairment. Special transitional requirements have been set for the application of the new general hedging model. This standard is effective for annual periods beginning on or after January 1, 2018. The Company will be electing the temporary exemption from IFRS 9 permitted to companies who activities are predominately connected with insurance. Under the temporary exemption, IFRS 9 will be adopted on January 1, 2021. The extent of the impact of adoption of IFRS 9 has not yet been determined.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 5. Line of Credit:

The Company has access to a line of credit with an authorized limit of \$250. This line of credit charges interest at prime +0.50%. No funds were drawn on the line of credit as at December 31, 2019.

#### 6. Investments:

	2019	2018
Guaranteed investment certificates (GIC's)	\$ 6,265	\$ 5,050
Fixed income:	4.007	F F07
Provincial	4,897	5,507
Corporate	5,059	4,086
Commercial mortgage pooled fund	5,946	5,140
Loan	775	-
Preferred shares	435	327
Total investments	23,377	20,110
Accrued investment income	124	92
	\$ 23,501	\$ 20,202

Maturities on the above investments are as follows:

		2019	2018
West :	•	0.000	<b>A</b> 7.704
Within one year	\$	8,836	\$ 7,721
Within two years		1,330	3,286
Within three years		1,740	630
Within four years		512	338
Within five years		1,068	-
Within five to ten years		2,734	2,667
No fixed maturity		7,157	5,468
	\$	23,377	\$ 20,110

Effective interest rates on the Company's GIC's and fixed income investments range from 1.25% to 3.45% (2018 – 1.25% to 3.45%)

Net investment income is comprised of:

	2019	2018
Interest income	\$ 603	\$ 472
Realized gains on disposal of investments Unrealized gains (losses) on investments	1 128	5 5
Investment fees	(108)	(103)
	\$ 624	\$ 379

Balance, end of year	\$	9,352	\$	4,152	\$ 5,200

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 10. Deferred policy acquisition costs:

The following table presents the movement of the Company's deferred policy acquisition costs during the year:

	2019	2018
Balance, beginning of year	\$ 3,332	\$ 2,853
Acquisition costs deferred Amortization of deferred costs	7,018 (6,721)	6,442 (5,963)
Balance, end of year	\$ 3,629	\$ 3,332

### 11. Property and equipment:

	Cost	Accumulated depreciation	Net book value
December 31, 2019			
Land Buildings and building components Furniture and equipment Vehicles	\$ 41 2,004 648 299	\$ 229 326 201	\$ 41 1,775 322 98
	\$ 2,992	\$ 756	\$ 2,236
December 31, 2018			
Land Buildings and building components Furniture and equipment Vehicles	\$ 41 2,004 449 299	\$ - 164 223 151	\$ 41 1,840 226 148
	\$ 2,793	\$ 538	\$ 2,255

Additions of \$199 Right-of-Use Assets, were made to Furniture and Equipment during the year. Carrying amounts of these ROU Assets as at December 31, 2019 was \$146.

Depreciation charged to general expenses in the year amounted to \$218 (2018 - \$162), of which \$53 related to depreciation of ROU Assets (2018 – nil).

Lease Liabilities of these ROU Assets as at December 31, 2019 amounted to \$146; 27% of these have maturities of about 4 years while 73% of these have maturities of about 2 years.

Expense of \$179 (2018 – nil) related to leases of low-value items for which the recognition exemption was applied

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

#### 12. Insurance risk management:

a) Nature of risks arising from insurance contracts:

There is uncertainty whether an insured event occurs and to what degree for each policy. By the very nature of an insurance contract, the risk is random and therefore unpredictable. Insurance companies accept the transfer of uncertainty from policy holders and seek to add value through aggregation and management of insurance risk.

The principal risk the Company faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Company is to ensure that sufficient reserves are available to cover these liabilities

The Company writes insurance primarily over a twelve month duration. The most significant risks arise through high severity, low frequency events such as natural disasters and catastrophes. A concentration of risk may arise from insurance contracts issued in a specific geographic location since all insurance contracts are written in Saskatchewan.

Underwriting risk, claims risk and product design and pricing risk are also important to the proper management of insurance risk. Underwriting risk is the exposure to financial loss resulting from the selection and approval of risks to be insured. Product design and pricing risk is the exposure to financial loss from transacting insurance business where costs and liabilities experienced in respect of a product line exceed the expectation of pricing it. Policies, processes and other internal controls have been established to manage these risks within tolerable levels.

Amounts recoverable from a reinsurer is estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements.

b) Sources of uncertainty and processes used to determine assumptions for insurance contracts:

The Company establishes an unpaid claims and adjustment provision to cover claims incurred but not settled at the end of the reporting period. The unpaid claims provision contains both individual claims estimates and an incurred but not reported (IBNR) provision.

Individual claims estimates are set by claims adjusters on a case-by-case basis and are continually monitored for adequacy. These specialists apply their knowledge and expertise, after taking available information regarding the circumstances of the claim into account, to set individual case reserve estimates. The policy and procedures by which case reserve estimates are set are well documented.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 12. Insurance risk management (continued):

The IBNR provision is a bulk provision intended to cover future development on claims that have occurred but have not yet been reported to the Company. Claims that have occurred may not be reported to the Company immediately; therefore, estimates are made as to their value and an amount.

The total unpaid claims and adjustment provision is an estimate that is determined using the Company's historical claims development patterns to predict future claims development. In situations where there has been a significant change in the environment or underlying risks, the historical data is adjusted to account for expected differences.

c) Objectives, policies and processes for managing risks arising from insurance contracts:

The Company's underwriting objective is to develop business within its target market on a diversified basis to achieve profitable underwriting results.

The Company uses comprehensive underwriting manuals which detail the practices and procedures used in the determination of the insurance risk for each item to be insured and the decision of whether or not to insure the item. The Company underwrites property lines on the basis of physical condition, replacement property values, claims experience, geography and other relevant factors.

In settling the provision for unpaid claims and adjustment expenses required to cover the estimated liability for claims, the Company's practice is to maintain an adequate margin to ensure future years' earnings are not negatively affected by prior years' claims development and other variable factors such as inflation. The Company monitors fluctuations in reserve adequacy on an ongoing basis.

The Company's pricing policy takes into account numerous factors including claims frequency and severity trends, product line expense rates, special risk factors, the capital required to support the product line and the investment income earned on that capital. The Company's pricing process is designed to ensure an appropriate return on equity while also providing long-term rate stability.

d) Objectives, policies and processes for managing insurance risk through reinsurance:

The Company manages this risk via its underwriting and reinsurance strategy within an overall risk management framework. Exposures are limited by having documented underwriting limits and criteria. Pricing of property, liability and auto policies are based on assumptions in regard to trends and past experience, in an attempt to correctly match policy revenue with exposed risk. Reinsurance is purchased to mitigate the effect of the potential loss to the Company. Reinsurance is placed with Farm Mutual Reinsurance Plan Inc. (Farm Mutual Re), a Canadian registered reinsurer.

Notes to Financial Statements (in thousands of dollars)

Year Ended December 31, 2019, with comparative figures for 2018

### 12. Insurance risk management (continued):

The Company has adopted policies of underwriting and reinsuring through excess of loss contracts of reinsurance which limit the exposure of the Company.

#### Excess of loss

Property and Liability – the Company retains \$160 on property and liability claims with recoveries at 100% on amounts greater than retention, up to a total limit of \$6 million per risk.

Automobile Physical Damage and Property Catastrophe – the Company retains \$480 with a Stop Loss of 70% on automobile physical damage and property losses incurred in the event of a catastrophe, with recoveries at 100% on amounts greater than retention on amounts.

Results of sensitivity testing based on expected loss ratios are as follows, shown gross and net of reinsurance as impact on pre-tax income:

	Proper	ty claims	Auto d	claims	Casualty	claims
	2019	2018	2019	2018	2019	2018
5% increase or coin loss ratio	decrease					
Gross Net loss	1,382 1,324	1,174 963	23 18	23 17	79 59	74 53

### e) Claims development:

The tables that follow present the development of claim payments and the estimated ultimate cost of claims for the claim years 2010 to 2019. The upper half of the table shows the cumulative amounts paid or estimated to be paid during successive years related to each claim year. The original estimates will be increased or decreased, as more information becomes known about the original claims and overall claim frequency and severity.

### 13. Financial instruments (continued):

#### a) Credit risk:

Credit risk is the possibility that counterparties may not be able to meet payment obligations when they become due.

Counterparty is any person or entity from which cash or other forms of consideration are expected to extinguish a liability or obligation to the Company. The Company's credit risk exposure is concentrated primarily in its fixed income portfolio and in its reinsurance recoverables.

Reinsurance is placed with Farm Mutual Re, a Canadian registered reinsurer. Management monitors the creditworthiness of Farm Mutual Re by reviewing their annual financial statements and through ongoing communications. Reinsurance treaties are reviewed annually by management prior to renewal of the reinsurance contract.

The Company's risk management strategy and investment policy is to invest in short term debt instruments of high credit quality issuers and to limit the amount of credit exposure with respect to any one issuer.

The maximum exposure to investment credit risk is outlined in Note 6.

There have been no significant changes from the previous period in the exposure to risk or policies, procedures and methods used to measure the risk.

### b) Market risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk includes interest rate risk and equity risk.

#### c) Interest rate risk:

Interest rate risk is the potential for financial loss arising from changes in interest rates. Changes in interest rate levels generally impact the financial results to the extent that reinvested yields are different that the original yields on fixed income securities. Changes in interest rates will affect the fair value of the fixed income securities. During periods of increasing interest rates, the market value of the existing fixed income securities will generally decrease. During periods of decreasing interest rates the opposite is true. The primary technique for measuring interest rate risk related to fixed income securities is duration analysis. Management and the board review the duration of investments to ensure they meet acceptable tolerance levels.

At December 31, 2019, a 1% move in interest rates, with all other variables held constant, could impact the market value of fixed income investments by \$385 (2018 - \$282).

The Company is not exposed to significant interest rate risk on its cash and cash equivalents, premiums receivable, due from reinsurers, reinsurer's share of unpaid claims, accounts payable and accrued liabilities, due to reinsurers and unpaid claims as their estimated market value approximates their carrying value due to the short term nature of those instruments.

Year ended December 31, 2019

### 13. Financial instruments (continued):

### d) Liquidity risk:

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet cash flow commitments associated with financial instruments. The Company's current liabilities arise as claims are made. Claims payments are funded by current operating cash flow including investment income.

To manage its cash flow requirements the Company maintains a portion of its invested assets in liquid securities. There have been no significant changes from the previous period in the exposure to risk or policies, procedures and methods used to measure the risk.

#### 14. Fair value measurements:

The Company's financial instruments measured at fair value on a recurring basis have been categorized into the fair value hierarchy as follows:

	Level 1	Level 2	Level 3	Total
December 31, 2019				
Cash and cash equivalents	\$ 5,882	\$ -	\$ -	\$ 5,882
Investments	17,780	5,721	-	23,501
	\$ 23,662	\$ 5,721	\$ -	\$ 29,383
	Level 1	Level 2	Level 3	Total
December 31, 2018				
Cash and cash equivalents	\$ 6,361	\$ _	\$ -	\$ 6,361
Investments	15,062	5,140	-	20,202
	\$ 21,423	\$ 5,140	\$ -	\$ 26,563

Notes to Financial Statements (in thousands of dollars)

Year ended December 31, 2019

#### 15. Income taxes:

Income tax expense, including both the current and deferred portions, varies from the amounts that would be computed by applying the statutory federal and provincial tax rates aggregating 27% (2018 – 27%) to earnings before taxes. A reconciliation is summarized in the following table:

	2019	2018
Tax at basic rates Increase (decrease) in taxes resulting from: Permanent differences	\$ 699	\$ 915
Rate differences Non-deductible and other items	(7)	(375) (4)
Income tax expense	\$ 692	\$ 536
Effective rate	27%	15.82%

Commencing in 2019 income from farm premiums became taxable. Prior to 2019, farm risks of approximately 40% of net premiums earned were exempt.

Income tax expense is comprised of:

	2019	2018
Current tax expense Deferred tax recovery	\$ 700 (8)	\$ 536 -
·	\$ 692	\$ 536

The tax effects of temporary differences which give rise to the deferred tax asset reported on the statement of financial position is from differences between amounts deducted for accounting and income tax purposes for the items presented below:

	2019	2018
Deferred income tax assets:		
Policy reserves Property and equipment	\$ 87 (58)	\$ 70 (49)
	\$ 29	\$ 21

Year ended December 31, 2019

### 16. Related party transactions:

Directors and key management personnel

Key management personnel consists of the Chief Empowerment Officer, Data & Analytics, and Communication.

Policies written with directors and key management personnel are approved under the same underwriting criteria applicable to policy holders. Directors and employees receive a 20% discount as no commission is paid to agents.

There are no benefits or concessional terms and conditions applicable to the family members of directors and key management personnel.

	2019	2018
Incurred claims by directors and key management personnel	\$ 35	\$ 39

During the year the aggregate value or policy premiums written to directors and key management personnel amounted to:

	2019	2018
Gross premium written	\$ 17	\$ 22

Aggregate compensation of directors and KMP during the year consisted of:

Salary and short-term benefits:		
Directors Key management personnel	\$ 51 337	\$ 57 361
	\$ 388	\$ 418

2019

2018

Transactions with directors, committee members, management and staff are at terms and conditions as set out in the underwriting and claims settlement policies of the Company.

Year ended December 31, 2019

### 17. Capital management:

The Company's objective when managing capital, is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide services to policyholders by pricing products and services commensurately with the level of risk and to maintain a capital base that is structured to exceed regulatory requirements. For the purpose of capital management, the Company has defined capital as retained earnings.

The Company is subject to a minimum capital test (MCT) imposed by the Superintendent of Insurance in the Province of Saskatchewan at a minimum supervisory target of 150%. The MCT is the excess of capital available minus capital required as measured by industry guidelines under a risk based capital adequacy framework. The Company's MCT at December 31, 2019 was 517% (2018 - 525%). The Company has adopted a plan that conforms to regulatory requirements.

The Company does not distribute earnings to its policyholders by way of dividends or other distribution. All earnings are retained to grow capital.

There have been no significant changes from the previous period in capital management policies and procedures.
